

**INFRAGISTICS**  
DESIGN / DEVELOP / EXPERIENCE

# Windows Forms & ASP.NET, Where Do We Go From Here?

JASON BERES : VP, Product Management  
jasonb@infragistics.com / @jasonberes / @infragistics

# Agenda

- 1 / The Infragistics Value Proposition
- 2 / User Experience & Platform Choice
- 3 / Technology landscape
- 4 / What are others using?
- 5 / Windows Forms vs. WPF
- 6 / WPF vs. Silverlight
- 7 / Silverlight vs. HTML 5
- 8 / New Emerging Technologies
- 9 / Wrap Up

# About Me

I Manage Interaction Design, Product Management, Technical Evangelism & Product Guidance at Infragistics

Microsoft .NET MVP for 8 Years

Author of 7 books, latest Silverlight 4 Professional from Wrox Press, INETA Speakers Bureau

# About Infragistics

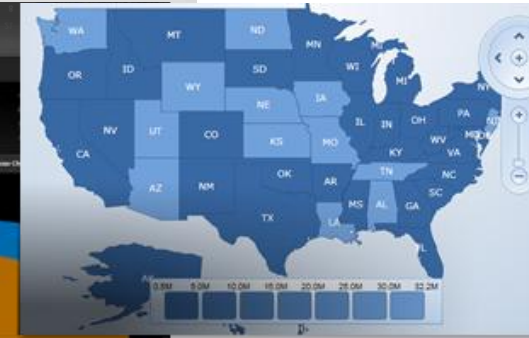

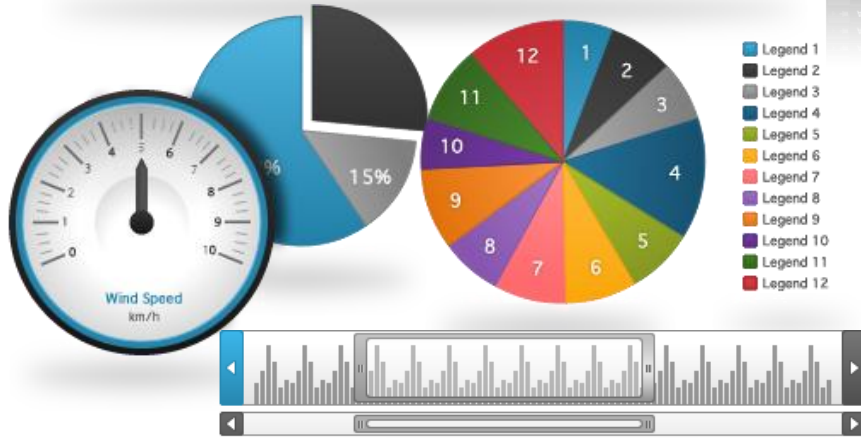

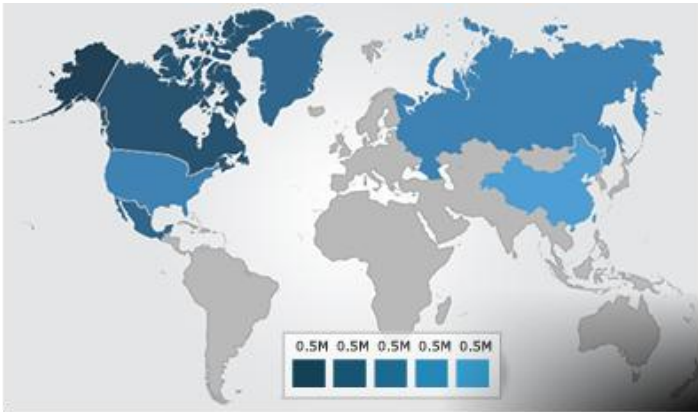

Worldwide leader in user experiences controls and components targeting for Windows Forms, ASP.NET, Silverlight, WPF, jQuery & HTML5

Focus on high performance scenarios for line of business and data visualizations

# Infragistics Value Proposition

- Performance, ease of use, and styling are key tenets to what we are delivering in our product.
- We consistently deliver enormous value to help you create better,
  - more modern applications, faster.
- Exceptional User Experience is a key piece that we deliver across all products.

# Core Investments

## RIA Technologies & Desktop Development

- LOB Components for Microsoft Platforms
- Depth and Breadth on the XAML Platforms (Silverlight/WPF)
- Single code base for SAML components
- Performance, Ease of Use, Styling Quality.

---

**asp** NETADVANTAGE for ASP.NET

**wpf** NETADVANTAGE for WPF

**win** NETADVANTAGE for WINDOWS FORMS

**wp** NETADVANTAGE for WINDOWS PHONE

**icon** NETADVANTAGE ICONS

**jq** NETADVANTAGE for JQUERY

**sl** NETADVANTAGE for SILVERLIGHT

## UX Tools & Services

- Quince Pro- A private, secure and organized way to collaborate, communicate and cultivate private UX design libraries to ensure consistent user experiences across your team, department and company.
- Usability, User experiences are key differentiations driving business decisions.
- Customer satisfaction and branding are on par with product features that drive productivity.

---

**cs** SERVICES CONSULTING

**ts** SERVICES TRAINING

**rpt** NETADVANTAGE REPORTING

**Q pro** QUINCE pro DESIGN LIBRARIES

**Q** QUINCE PATTERNS BROWSER

## Data Visualization

- XAML Platforms
- Dashboards & Reporting
- Performance, Ease of Use, Styling Quality
- Help businesses make better decisions

---

**dv** NETADVANTAGE for SILVERLIGHT  
DATA VISUALIZATION

**dv** NETADVANTAGE for WPF  
DATA VISUALIZATION

## TestAdvantage

- Enterprise level testing capabilities
- Higher quality product through test automation
- Reduce the need for cost of manual testing
- Increase productivity with the time savings as the testing stage finishes

---

# User Experience of the Platform

# Focus on What's Important

## User Experience

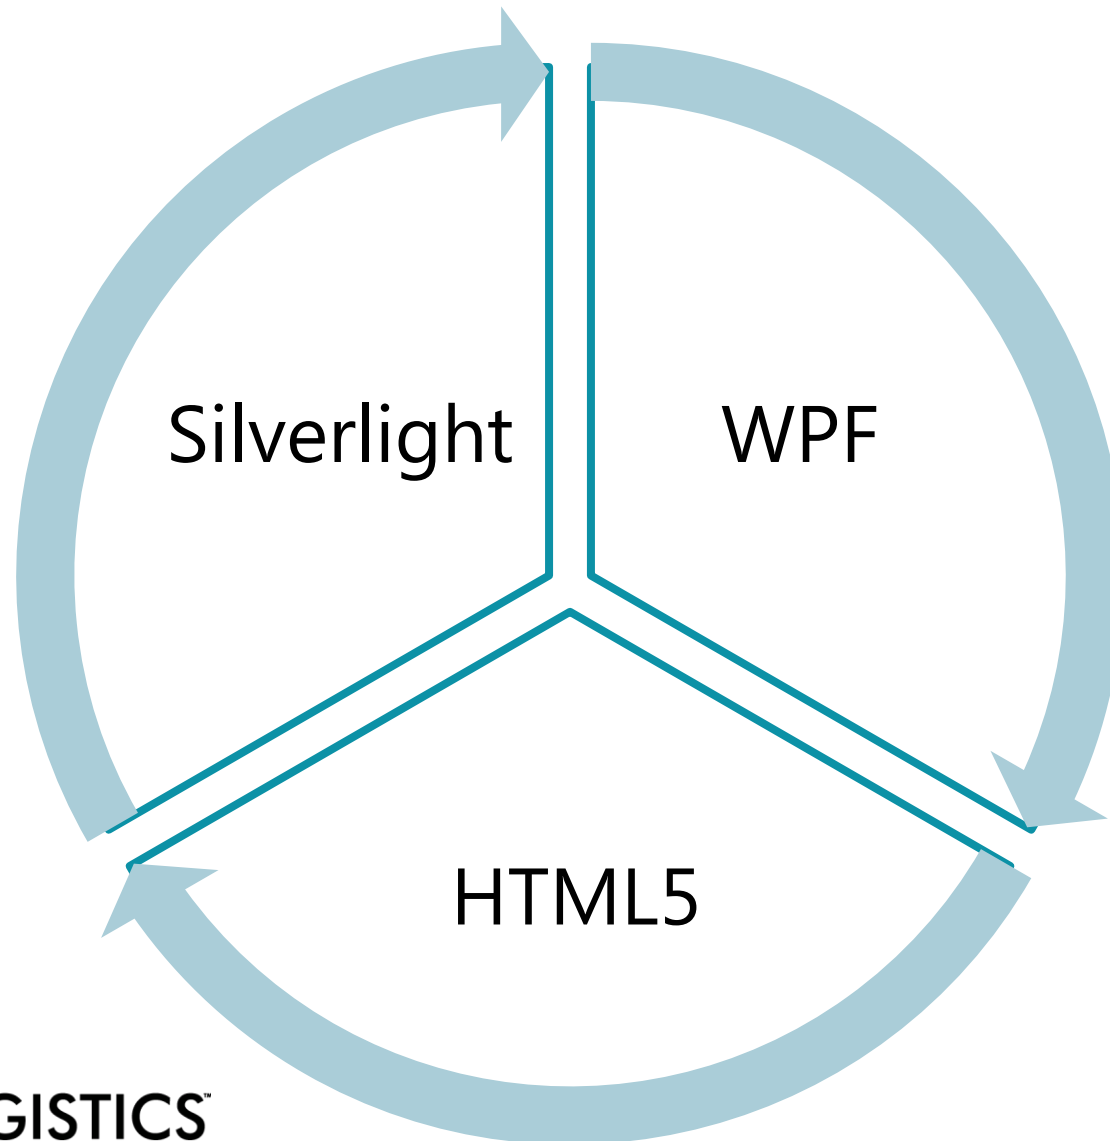

- Useful
- Usable
- Desirable

# Making the Right Choice

# Key Choices Today for UX

# Types of Apps - By the Numbers

//

*What are the primary types of software you are currently developing? (multiple responses accepted)*

## Microsoft Silverlight Player

~75% Computers connected to Internet run Silverlight

> 95% Windows 7 computers run Silverlight

# UX Choice – By the Numbers

# Windows Forms vs. XAML

# Windows Forms vs. WPF

- WPF is not a replacement for Windows Forms
  - It's just a tool, a means to an end
- WPF
  - Media, Animations, Theming, 3D, Web-like navigation
- Windows Forms
  - Familiarity, lots of domain knowledge, great design time, simple forms over data

# WPF Benefits for Coders

- Separation of UI and logic with declarative code
- Interoperability with Windows Forms
- GPU Acceleration
- Vector graphics
- Richer 3<sup>rd</sup> Party (more in the Toolkit)
- Enhanced layout capabilities
- Data templates
- UI Virtualization
- Code re-use with XAML / Windows Phone 7

# Apples to Apples

	Windows Forms	PDF	GDI+	Windows Media Player	Direct3D	WPF
Forms, Controls	X		X			X
Complex text		X				X
Images	1/2		X			X
Video / Audio	1/2			X		X
2D Graphics	1/2		X			X
3D Graphics					X	X

# The Declarative Glue

## – eXtensible Application Markup Language

- Easily toolable, declarative markup
- Code and content are separate
- Can be rendered in the browser / standalone application

### XAML

```
<Button Width="100"> OK
<Button.Background>
  LightBlue
</Button.Background>
</Button>
```

### C#

```
Button b1 = new Button();
b1.Content = "OK";
b1.Background = new
SolidColorBrush(Colors.LightBlue);
b1.Width = 100;
```

### VB.NET

```
Dim b1 As New Button
b1.Content = "OK"
b1.Background = New _
  SolidColorBrush(Colors.LightBlue)
b1.Width = 100
```

# Developer – Designer User Experience

- XAML Brings Designers & Developers Together
- Visual Studio + Expression Blend
  - XAML – Common Syntax
  - Same Project Structure
  - Results
    - Optimized Workflow
    - No (or less) Throwaway Artwork
    - Faster Time to Market
- UX -> Design -> Designers -> Developers?
  - Beauty and the Beast

Don Box and Chris Anderson..\medi.

▶ Don Box and Chris Anderson

▶ Pat Helland on Software

Alternate Theme

Is it more of a XAML Choice?

## WPF – Rich Client

New application development  
targeting new client  
technology

Line of business – both internal  
and customer facing

## Silverlight – Web RIA

Simpler deployment model

Lighter weight framework

Dashboards, audio/video,  
interactive user interfaces

# The XAML UX

# Problems Solved with XAML

- Makes prototyping applications simpler
  - Use of XAML by developer and designer enhances workflow
  - Common tooling brings application design closer to original concept of designer - Reduces “throw away” art work
- Rich, Interactive Graphics
  - Vector, Composition, Animation
- Improved User Experience
- Sophisticated Interactions Reduce Human-Computer Impedance Mismatch

# Silverlight vs. WPF

1 / What's the Difference?

2 / Which one is Faster?

# Feature Matrix

Feature	WPF	Silverlight
<b>File Access</b>	Unlimited	My Documents, My Videos, My Pictures
<b>Printing</b>	Full access	Printing UI Elements
<b>Document Editing</b>	Flow Document, Rich Text	RichTextArea
<b>Commanding</b>	Raising Commands, Routed Commands	Raising Commands
<b>Communications</b>	WCF, WS-*, Low level communications	Subset of WCF, Sockets – Cross Domain Issues
<b>Clipboard Access</b>	Anything Serializable	Text only
<b>Drag &amp; Drop</b>	Anything	Files
<b>Attached Devices</b>	Anything with a driver – COM, Win32	Webcams, Camera, Microphone, COM API
<b>Input Controls</b>	Keyboard, Mouse, Pen, Multi-touch	Out of Browser Elevated Trust for full keyboard access

# Key Asks for Applications

- Performance a top frequently requested ask:
  - *“Performance improvement of column charts with large amounts of data”*
  - *“Performance increase”*
  - *“Improve Control Performances.”*
  - *“Improve performance”*
  - *“Performance, performance, performance”*
  - *“Work on the Performance.”*
  - *“We need to support large data volum[es] with good performance”*

Cool Examples  
Performance  
COM Interoperability – Out of Browser  
RAD RIA Services

**DEMO**

# Silverlight vs. HTML5

# From the Horses Mouth

- **Silverlight** - Delivers the richest set of capabilities available to developers today, making the choice of Microsoft technologies even more compelling.
- **Silverlight and XNA** - Core fundamental building blocks for building rich experiences that take full advantage of Windows Phone.
- **HTML5** - Solution for many scenarios, and developers should make the appropriate choice based on application needs, knowing that we have a heritage and a future vision of supporting a wide variety of technologies to meet those needs.

- HTML5 will be the new standard for HTML, XHTML, and the HTML DOM
- The previous version of HTML came in 1999. The web has changed a lot since then.
- HTML5 is still a work in progress. However, *most* modern browsers have some HTML5 support.

# Who's Driving It?

- Apple
- Google
- Microsoft

HTML5 is a cooperation between the World Wide Web Consortium (W3C) and the Web Hypertext Application Technology Working Group (WHATWG).

WHATWG was working with web forms and applications, and W3C was working with XHTML 2.0. In 2006, they decided to cooperate and create a new version of HTML.

Some rules for HTML5 were established:

- New features should be based on HTML, CSS, DOM, and JavaScript
- Reduce the need for external plugins (like Flash)
- Better error handling
- More markup to replace scripting
- HTML5 should be device independent
- The development process should be visible to the public

# Why Is It Cool?

- Semantic Web
  - Tags for how we think, how we read

`<article>`

`<header>`

`<hgroup>`

`<section>`

`<section>`

`<figure>`

`<figcaption>`

`<footer>`

# HTML 5 Markup

`<article>`  
`<aside>`  
`<audio>`  
`<canvas>`  
`<command>`  
`<datalist>`  
`<details>`  
`<embed>`  
`<figcaption>`  
`<figure>`  
`<footer>`  
`<header>`  
`<hgroup>`  
`<keygen>`  
`<mark>`

`<meter>`  
`<nav>`  
`<output>`  
`<progress>`  
`<rp>`  
`<rt>`  
`<ruby>`  
`<section>`  
`<source>`  
`<summary>`  
`<time>`  
`<video>`  
`<wbr>`

# JavaScript API

Contacts  
Selection  
Offline Apps  
Indexed Database  
Web Workers  
Web Storage  
Web Sockets  
Web SQL DB  
Server Events  
XMLHttpRequest Level 2  
Geolocation  
Canvas 2D Context  
HTML Microdata

# Emerging Technologies

# Enter the Phone

- Customer demand increases for ubiquitous applications / dashboard experience

# Best Practices - Information Dissemination

- Don't Discriminate
  - Include the same content for all devices
- Include Most Relevant Information First
- Augment Display with the Real World
  - Date, Time, Weather, Location

One Last Thing ...

# LightSwitch

- Developers aren't the only ones building applications

# Fast Forms Over Data

Easy CRUD

**DEMO**

# Platform Summary

## Reach vs. Rich

# Wrap Up

- \ There are many user experience technology options
  - Use a good process to discover what users need
  - Research the correct platform that best suits your application needs
- \ Silverlight is a high performance, rich platform for delivering line of business and great user experience
- \ HTML5 is new, about 2 years away from widespread adoption with the disparate browser support and changing spec
- \ Consider emerging platforms like Windows Phone 7 & LightSwitch
